EXPERIENCE THE BENEFITS

Unlock Your Potential

Push past your limits and achieve your goals. With our portable ice bath, you can enhance your endurance and perseverance.

Recover Faster

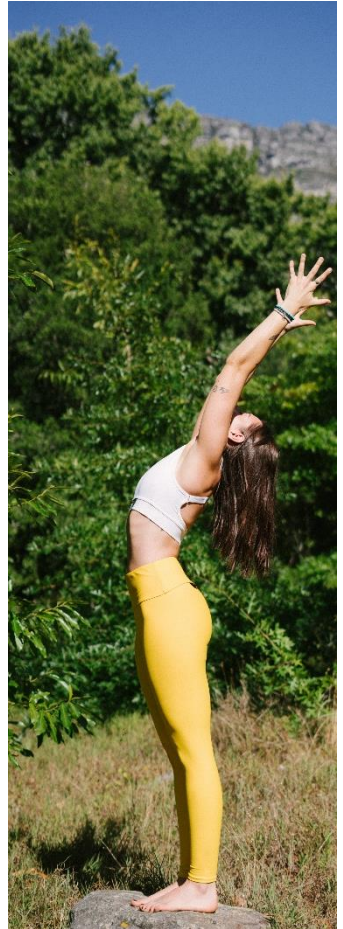

Reduce inflammation and improve recovery time. Our ice bath stimulates the production of endorphins, lowers cortisol levels naturally, and helps improve immune function.

Relax and Recharge

Take time to de-stress and improve your mental well-being. By embracing the cold, you can lower your blood pressure, enhance cardiovascular health, and feel more present in the moment.

Experience the Thrill

Embrace the stillness and savour every moment. Our portable ice bath provides you with an exhilarating and refreshing experience that you won't find anywhere else.

ASSEMBLY GUIDE

1

Insert the six support legs into the holes located at the base of the ice bath.

2

Use the hand pump to inflate the top support ring and Thermo Lid.

3

Make sure the pump is fully inserted into the valve and inflate until the rings are completely smooth.

4

Once you've finished inflating, seal the valve with the safety cap to prevent air from escaping.

ASSEMBLY GUIDE

5

Before filling the ice bath, ensure that the base drain cap is closed.

6

Locate the side drain valve and ensure it is tightly sealed to prevent leakage.

7

After you've set up the ice bath and closed the valves, fill the bath up to 2/3 capacity to accommodate your body. Make adjustments later if needed.

8

When finished, open the side drain valve to release the water. Allow the water to drain completely before disassembling and storing.

MAINTENANCE & CLEANING

- Before using your ice bath for the first time, clean it with warm water and a mild soap. Rinse thoroughly and wipe it down with a clean, dry cloth.
- Avoid using strong chemicals or bleach-based detergents to clean your ice bath, as this may damage the materials and waterproof seals.
- To empty your ice bath, use the included hose to empty the water into a nearby sink or drain. We recommend draining, cleaning, and drying your ice bath every two to three weeks to prevent the growth of bacteria.

IMPORTANT SAFETY INFORMATION

- Consult with your doctor before using the portable ice bath if you have any pre-existing health conditions.
- Do not use the portable ice bath if you are under 18 years of age, pregnant, have a history of heart disease or high blood pressure, have diabetes or complications such as neuropathy or retinal damage, wear a pacemaker, have a history of frostbite, have an open wound, or have had recent surgery.
- Always start with short sessions in the ice bath and work your way up to longer sessions to prevent a sudden drop in body temperature, which can lead to health complications.
- Be sure to read and follow all instructions included with the portable ice bath to ensure safe and proper use.
