

PROFILE

Product Design Engineer focused on taking products from concept to functional solutions. I enjoy working hands-on with design, CAD, and prototyping, combining technical problem-solving with user-centered thinking.

With experience from both product development projects and running my own e-commerce business, I bring a practical and result-driven approach to building products that work in real-world use.

EXPERIENCE

Master Thesis Project

Dec 2024-Jun 2025

DB JOURNEY

Developed a new bag concept in collaboration with Db Journey, focusing on functional design and user needs.

- Developed design concepts based on user insights
- Designed functional solutions to improve usability
- Created CAD models and iterated concepts with team feedback

Founder / Entrepreneur

Mar 2023-Mar 2024

HYDROFIC

Built and scaled a product-based business within sports products in a competitive e-commerce market.

- Generated ~6M SEK in revenue
- Managed end-to-end operations from sourcing to sales
- Optimized online sales and customer experience

Process Operator

Jan 2020-Jun 2025

ASTRAZENECA

Developed and standardized a new production process, including defining workflows and creating SOPs. Worked part-time during summers alongside studies from 2020.

Technician

Aug 2019-Dec 2019

ASTRAZENECA

Worked hands-on with troubleshooting and resolving production issues in machinery, supporting operators during disturbances and breakdowns.

EDUCATION

M.Sc. Industrial Design Engineering

Sep 2020-Jun 2025

LULEÅ UNIVERSITY OF TECHNOLOGY

Product development, CAD, visualization, and user-centered design

High School Diploma (Industrial

Aug 2016-Jun 2019

Engineering)

MÅLARDALENS TEKNISKA GYMNASIUM

Extensive practical training (~50%) including CAD, manufacturing, and hands-on experience from placements at Scania and AstraZeneca
